

Support for Students

Each year the Williams Lake Field Naturalists is pleased to provide a bursary to a student graduating from Lake City Secondary School to attend a post-secondary school in a biological, environmental, or related field. The bursary, currently for \$1,500, is awarded to a student selected by the School District 27 Williams Lake Scholarship Committee. Funds for the bursary have been raised each year through a yard and garden sale held in mid May at Scout Island Nature Centre.

The Williams Lake Field Naturalists also offers mentoring support to School District 27 students who wish to be part of a School District independent studies project at Scout Island Nature Centre.
